

Counselling Cell 2018

Providing professional ambience and guidance in resolving personal and psychological problems has always been the motto of the counselling cell. When we listen to someone and advice about their personal problems we help them to see life better. Problems can arise in different areas like personal, financial health, family and professional areas. It is our duty to give the direction and suggest as per the situation.

This will help that person to resolve their problems and improve their character behaviour and values. Sometimes it is designed person to person; at times it happens in group. The aim of a counsellor is to help the students reach their self determined goal through resolution and problems.

BWMC aims at healthy interpersonal relationships still striving it best to resolve issues. This gives the students a safe, security and warmth to build a therapeutic relationship.

Various talks were held in classes to motivate students self esteem. Swiss Rein. S.R a student of our college of 2016 batch, who is presently doing her masters in social work, gave a very inspirational and motivational speech self esteem and interpersonal relationship. This helped the students to self analyse the question to others.

Thus BWMC focuses on a healthy and positive outlook through counselling sessions.
